Year Home Warranty is included.

Dear New CBH Homebuyer -

Here's what you need to know prior to electing to have a third party inspection on your new CBH Home!

We believe in our process and our product and we're here to help you with your new home purchase.

Before you spend over \$500 cash out of your pocket we want to be sure you are aware of the items an inspector might make note of and what **we will** and **will not** cover. You will also want to know that having an inspection will add a minimum of two weeks to your closing time frame which can be frustrating when you are ready to close and move in to your new home.

We understand inspections are very common and necessary in the resale home market, because older homes typically do not come with a home warranty. Our 89 point CBH new home construction inspection checklist along with our one year new home warranty will give you the peace of mind you need.

We also have a wonderful warranty department here to serve you and help as you get settled in your new CBH home.

Please refer to the attached CBH Homes inspection FAQs document, our CBH construction manager new home inspection checklist, and our one year new home warranty when deciding to opt in or out of a third party home inspection.

Our reputation depends on top-quality construction and service. We're building more than a new home for you and we want you to be sure every dime out of your pocket is well spent.

Love Wins.

Team CBH

New Home Construction Inspection FAQs for Buyers

Items we always complete regardless of an inspection:

- 1. Touching up paint/blue tape.
- 2. Resolving fine grading/drainage issues.
- 3. Spreading visqueen out in crawlspace to fully cover dirt.
- 4. Removal of trash/debris in crawl space.
- 5. Removing water in crawlspace (seasonal).

Items we receive but decline on a home inspection:

- 1. Blowing out sprinklers.
- 2. Caulking of exterior windows to the trim.
- 3. Additional items (gutters, downspouts, garage door openers, fencing, etc.) not included in Purchase and Sale Agreement.
- 4. Discoloration of concrete (blanket marks) due to the application of thermal blankets during winter.
- 5. Finishing interior of furnace closet.
- 6. Painting/staining threshold at main doors.

Items we receive that are at our Construction Manager's discretion and depend on if there is an unresolved or other related issue:

- 1. Sealing cracks in foundations that are deemed normal.
- 2. Removing dust in HVAC system
- 3. Addressing filter on fresh air intake. *City determines.

Categories covered at our Construction Manager's final walk-through and inspection checklist:

- 1. Plumbing rough-in: 6 point checklist
- 2. Electrical rough-in: 1 point checklist
- 3. Stake out: 4 point checklist
- 4. HVAC Rough-in: 13 point checklist
- 5. Backfill/Compaction: 4 point checklist
- 6. Heat Duct Install: 3 point checklist
- 7. Insulation Foam Seal: 5 point checklist
- 8. Siding Install: 4 point checklist
- 9. Paint: 3 point checklist

- 10. Grading: 4 point checklist
- 11. Vinyl Flooring Install: 2 point checklist
- 12. HVAC Trim: 6 point checklist
- 13. Electrical Trim: 4 point checklist
- 14. Landscape: 5 point checklist
- 15. Final Inspection: 24 point checklist

CBH CONSTRUCTION MANAGER
